Pick the Right Can Liner for the Right Application

Choosing the right can liner for the receptacle can save you money and reduce plastic consumption. Identify the type and weight of the content, the transport conditions and size of the receptacle. Once that information is identified, the correct type and size of liner can be chosen.

High Density Can Liners

- Smooth & Non-Sharp Materials
- Cans without sharp edges, food without sharp edges
- Grass, rags, smooth heavy objects
- Paper-plates, cups, towels, office

Low Density Can Liners

- Rough & Sharp Materials
- Plastic eating utensils, food with rough edges
- Sticks, rough yard trimmings or glass
- Metal with sharp edges

Recycle Composition/Repro Can Liners

Reprocessed resin can liners are made from reused plastic yet are strong, durable and economical. They offer high value combined with strong performance.
